### Optional mathematics tests

# **Grid for test analysis**

This grid is for optional use and has been provided to help teachers analyse the performance of pupils in the year 5 optional mathematics tests.

The grid provides information on which part of the Programme of Study is targeted by each question. Sometimes a question covers more than one part of the Programme of Study. Where this is the case, a judgement has been made as to what is the main focus of the question.

Teachers may find it useful to record the performance of their pupils in order, with the pupils who have scored the highest marks in the test first. This will allow patterns in attainment to be seen more easily. It can be used to analyse the performance of particular groups of pupils, eg those for whom English is an additional language, pupils with special educational needs or those just missing a level 5. It might also be useful to look at a particular question or group of questions – have they been answered well or badly; why might this be?

Many local education authorities provide something similar to this grid, either on paper or in the form of a spreadsheet. This grid is not intended to supersede any of these materials. It is for optional use and is intended for those teachers who do not have access to other materials.

## Year 5 optional mental mathematics test – grid for test analysis

National percentage correct per question

#### Fill in the grid as follows: 1 for mark awarded **0** for question attempted but no mark awarded Use units of time Total score for question omitted Multiplication a (context) The national percentage for each question (which can be entered below) will be available on the QCA website www.qca.org.uk from early 2007. **UAM** PoS ref 13 18 19 Question 2 4 6 8 9 10 11 12 14 15 16 17 Names achieved Mark 17 18 19 20 22 25 26 27 28 29 30 31 32 33 34 Total number of marks per question Total number of omitted questions Class percentage correct per question
