

## Puzzle time

Not three in a line!

This 3 x 3 square has  
three counters in it in a  
row.

But what I want to know is how  
many counters you can place without  
getting three in a row!  
You can have one or two in a row but  
not three!

And then...how many counters can you put in  
a 4 x 4 square without getting three in a row!

Find the answer on the next page.

## Puzzle time

Not three in a line - answers

You can place a maximum of six counters in a 3 x 3 grid without getting three in a row.

There is more than one way of arranging these 6.

You can place a maximum of eight counters in a 4 x 4 grid without getting three in a row.
