

Matchstick puzzle 7

7. Seven up!

This two by two square is made up of 12 matchsticks.

There are 5 squares - four small ones and one larger one.

By moving just two matchsticks can you make seven squares?

Now, to make 7 you are going to have to think, 'small squares'!

Matchstick puzzle 7 - answer

7. Seven up!

I bet you didn't get this one - bit unusual isn't it!
