

This is the start of you becoming a real mathemagician.

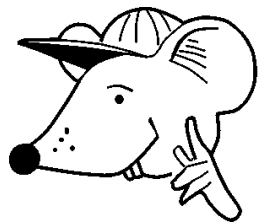

Stun your parents with your amazing mathematical skills!

Try this one first:

Find a gullible (easily taken in) adult. Ask them to work this sum out:

1. Think of a number (under 10 if your adult is not good at maths)
2. Double it.
3. Add on 6.
4. Half it.
5. Take away the number you first thought of.

It always works - can you see why?  
Try adding 8 instead of six.  
Your answer will then be 4.

Then tell them that Dave says

**"The answer is 3....."**
