

## Puzzle time

### Triangular terror!

**Now all you have to do is work out what number should go in the fourth triangle.**

To give you a clue, you have to do something ( or some things ) to the three numbers round the outside of the triangle to get the number in the middle.

You then have to use the same rule for all the triangles.

Good luck - it's easy if you see what needs doing, but impossible if you don't!!

Find the answer on the next page.

### Triangular terror! - answers

All you had to do is work out what number should go inside the fourth triangle.

Well, it may be called a terror but you probably didn't find it terrible at all.

An explanation here:

**The answer is 7**

because 4 times 4 is 16, take away 4 is 12

5 times 2 is 10, take away 1 is 9

3 times 3 is 9, take away 8 is 1

the last one:

2 times 8 is 16 take away 9 is 7
